**DETAILED ACTION**

***Election/Restrictions***

Applicant's election with traverse of Group II, Claims 5-8, and the species election of the following five isolated and purified saccharides: arabinose, fucose, xylose, galacturonic acid and glucucoronic acid in the reply filed on June 6, 2005 is acknowledged.

As Applicant's arguments with regard to the requirement for election of species has been found persuasive, the Office agrees to examine each of the instantly claimed ingredients recited in the Markush group of Claim 5.

**Claims 5-8 are under examination.**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 5-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Bradbury et al. (U).

Applicant claims a dietary supplement comprising: a nutritionally effective amount of isolated and purified acetylated mannose; and at least five isolated and purified saccharides selected from galactatose, glucose, mannose, xylose, N-acetylneuraminic acid, fucose, N-acetylgalactosamine, N-acetylglucosamine, arabinose,

glucuronic acid, galacturonic acid, iduronic acid and arabinogalactan. Applicant further claims the dietary supplement of claim 5, wherein the five isolated and purified saccharides are powdered; wherein the five isolated and purified saccharides are essential saccharides; and wherein the five isolated and purified saccharides further comprise glucosamine and rhamnose.

Bradbury teaches a composition comprising nutritionally effective amounts of isolated and purified saccharides of acetylated mannose, mannose, galactose, glucose, xylose, arabinose, arabinogalactan and rhamnose.

The reference anticipates the instantly claimed invention.
